Summer Examinations 2016

SLS300116N

Module Title: Health Risk and Environment
Level: Six
Time Allowed: Two hours

Instructions to students:
- Enter your student number **not** your name on all answer books.
- Answer **two** questions.
- All questions are equally weighted.
- Begin each question in a separate answer book; label each answer book clearly with the number of the question you are answering.

No. of Pages | 2
---|---
No. of Questions | 5
Answer two of the following questions:

1. Discuss the causes of the current antibiotic resistance crisis and the steps that need to be taken to stop antibiotics becoming obsolete.

2. Genetically Modified (GM) crops are said to be a “risky technology” that should not be released into the environment. Yet they have the potential to help feed the world. Discuss the arguments, for and against, the use of GM crops in world agriculture.

3. Drug use and abuse has become commonplace in Britain and worldwide. Discuss the benefits and problems that occur with the increasing availability of drugs in society.

4. Evaluate the argument that sugar not salt is responsible for the increasing prevalence of hypertension.

5. Discuss possible mechanisms of asbestos induced carcinogenesis.
